

The Keyser Group Technology Charleston Show

The Keyser Group (TKG) provides Total End to End Security Solutions, installed at DOD and Federal Business facilities under the highest security clearance requirements. We invite you to our Technology Show in Charleston, South Carolina on **December 13th and 14th**. The show will be held at the Marriott SpringHill Suites at 98 Ripley Point Drive, Charleston, SC 29407. The event will **begin at 10am** with presentations from each of our technology partners. Following the presentations, there will be a catered lunch for all of the show attendees. After lunch, our technology partners will be happy to perform personalized demonstrations as well as meet with our attendees one-on-one to discuss any areas of interest. Please **RSVP** via srice@thekeysergroup.com or 717-227-0835 by December 7th, so that we have an accurate account for Lunch Services.

Technology Partners to be Presented

Biometric Solutions - Sagem Morpho, the industry leader in multi-biometric solutions, develops, manufactures, and integrates multiple biometric technologies including fingerprint, iris and facial recognition products and services. [Sagem Morpho website](#)

Networked Video Solutions - Verint Systems is a leading global provider of analytic software-based solutions for networked video. **Nextiva™** is a powerful, enterprise-class video management platform and suite of applications that empowers your organization to enhance security and improve performance. Verint solutions transform voice, video, and text into actionable intelligence – yielding timely, mission-critical insights for achieving strategic goals. [Verint website](#)

Critical Audio Communications - Zenitel USA is a leading worldwide supplier and manufacturer of security and critical communications systems. The **STENTOFON™** brand is synonymous with high-end, quality security communication systems. Zenitel manufactures and distributes sophisticated communications equipment including Digital Intercom, VoIP Intercom, Paging products and Digital Video Management Systems. [Stentofon website](#)

Under Vehicle Scanning - SecuScan is the Under Vehicle Monitoring System from **TCS International**. With its innovative technology, the system supports fast and easy detection of dangerous objects such as weapons, explosives, drugs and contraband. [SecuScan website](#)

PL1 Certified Security System - The Diebold LINX Predator Elite™ security solution features a truly integrated, multi-tasking, centralized system with unlimited expansion and scalability options. LINX Predator Elite is integrated with many technologies, including STS Ground Based Radar Systems and DII Infrared Imaging Systems, to form a complete force protection system. [Diebold website](#)

Relocatable Arms Vault (RAV) - With the **Diebold Relocatable Arms Vault (RAV)**, you no longer have to choose between the security level of a permanent vault and the mobility of a temporary vault. The 208 square-foot model can be picked up and transferred in one piece on one truck, while the 360 or 400 square-foot model can be transported on two trucks with only one seam to rejoin on site.

Advanced Technology Solutions - ICx Technologies develops advanced technologies for effective security solutions. Our sensors detect and identify chemical, biological, radiological and explosive (CBRNE) materials. Our surveillance products discern people and objects invisible to human senses and conventional cameras. Our software and systems connect, command, and control these security devices. [ICX website](#)
